We Forge

DIGITAL EXPERIENCES

CUSTOM BUSINESS SOFTWARE

SCALABLE WEB APPS

AUTOMATION SYSTEMS

POS SYSTEMS

MODERN · SCALABLE · GROWTH-DRIVEN

We craft digital experiences that blend *aesthetics* with *functionality*.

ForgeWeb is India's premier Website Design & Development Agency, operating as a full-fledged digital production house focused on building real, scalable solutions.

We understand that modern businesses need more than just an online brochure. You need robust systems that handle operations, drive sales, and scale without friction.

That's why we engineer custom software, automation tools, and high-performance websites that work tirelessly for your business.

"Think like a business owner, build like a developer, and deliver like a production system."

Our Mission

To empower businesses with innovative digital solutions and automation systems that drive real, measurable growth.

Our Vision

To become the leading digital production house globally, redefining how businesses scale through custom software.

5+

YEARS EXPERIENCE

50+

PROJECTS DELIVERED

100%

CLIENT SATISFACTION

All your *software needs* in one place.

WEBSITES & WEB APPS

- High-Performance Websites
- Scalable Web Applications
- E-Commerce Platforms
- Custom Business Portals
- Landing Pages

CUSTOM SOFTWARE

- Custom Business Software
- POS Systems (Offline & Online)
- ERP & CRM Systems
- Service Business Systems
- Institutional Software

AUTOMATION SYSTEMS

- Workflow Automation
- API Integrations
- Data Syncing Tools
- Automated Invoicing
- Internal System Bots

Note: We explicitly do **NOT** do social media management or standalone design work. We are a dedicated software engineering production house.

Ready-to-deploy *Products.*

FlashBill

- ✓ GST-compliant invoices
- ✓ Multi-user roles (Admin/Cashier)
- ✓ Setup in a single afternoon

EduHub

COMING SOON

An advanced institute management system covering attendance, timetables, fee tracking, and dedicated student/parent portals for schools and coaching centers.

ServiceDesk

COMING SOON

A powerful CRM built specifically for service-based businesses to seamlessly handle job scheduling, client relationship management, and automated invoicing.

How we *operate* — transparency at every step.

1

Consultation & Scope

We start by deeply understanding your brand and business goals. We define exact requirements to build systems that scale with you.

2

Timeline Estimation

A basic 5-page website typically takes **7–10 days**. Complex e-commerce or SaaS platforms take **4–8 weeks**.

3

Development & Execution

Crafting a modern, stunning UI combined with a high-performance backend. We use a transparent **20/80 Payment Model**: 20% advance to lock your slot, 80% after completion and full satisfaction.

4

Launch & Handover

Deploying the software to production with strict QA testing. We ensure zero friction when taking your system live.

5

Post-Launch Support

Every project includes **1 month free tech support** and 2 minor updates. Long-term Annual Maintenance Contracts (AMC) available.
